EXAMINER

DALENCOURT, YVES

ART UNIT

PAPER NUMBER

2157

DATE MAILED: 03/23/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/071,312

Applicant(s)

HARBIN ET AL.

Examiner

Yves Dalencourt

Art Unit

2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 and 18-27 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-9 and 18-27 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2157

DETAILED ACTION

1. This office action is responsive to amendment filed on 12/27/2005.

Response to Amendment

2. The examiner has acknowledged Applicants' response.

Response to Arguments

3. Applicant's arguments with respect to claims 1 - 27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 9 recites the limitation "the network adapter" in line 3. There is insufficient antecedent basis for this limitation in the claim. A network adapter has not previously been identified in claims.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or

Art Unit: 2157

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1 – 22, and 24 - 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Johnson et al (US 2002/0161934; hereinafter Johnson).
8. Regarding claims 1, 18 - 19, and 24 – 25, Johnson teaches a system and a storage node comprising a communication adapter coupled to a transmission medium to transmit and receive data according to a network protocol (figs. 1-6; paragraphs [0025] and [0035]); a data bus coupled to one or more storage nodes, each storage node comprising storage resources and logic to transmit data to or receive data from a storage medium according to an input/output format (paragraphs [0025], [0029] and [0039]); and a processing system to host a common transport agent, the common transport agent comprising a first interface comprising one or more method interfaces to communicate with each storage node independently of the input/output format of the storage node (abstract, paragraphs [0012], [0041], [0050], [0056], [0058], and [0065]; Johnson discloses that the remote procedure call used to transport the formatted data to storage management system 104 is operating system independent). Claim 18 adds the limitation of an I/O controller to store data and retrieve data from a storage medium according to an I/O format (paragraph [0071]).
9. Regarding claims 2 and 26, Johnson teaches the system of claim 1 and the storage node of claim 18, wherein the processing system further comprises a unit management agent to discover the storage resources of the storage nodes

Art Unit: 2157

and post an indication of the discovered storage resources to the network (paragraphs [0056] and [0062 – 0063]).

10. Regarding claim 3, Johnson teaches the system of claim 2, wherein the unit management agent comprises logic to establish a connection between a client on the network and a storage node in response to a connection request from the client (paragraphs [0038 - 0039]).

11. Regarding claim 4, Johnson teaches the system of claim 1, wherein the system further comprises a plurality of storage nodes coupled to the data bus (paragraph [0021]).

12. Regarding claim 5, Johnson teaches the system of claim 4, wherein each of the storage nodes comprises: an input/output controller coupled to a storage medium to store data in or retrieve data from the storage medium according to an input/output format (805, fig. 8); and a processing system to host a device driver module to communicate with the input/output controller according to the input/output format (paragraphs [0039] and [0041]); and a remote transport agent to communicate with the first interface of the common transport agent independently of the input/output format (paragraphs [0012], [0041], [0050], [0056], [0058], and [0065]; Johnson discloses that the remote procedure call used to transport the formatted data to storage management system 104 is operating system independent).

13. Regarding claim 6, Johnson teaches the system of claim 4, wherein each of the storage nodes is coupled to a redundant array of independent disks through an input/output channel (paragraph [0023]).

Art Unit: 2157

14. Regarding claims 7 and 20, Johnson teaches the system of claim 6, wherein the input/output channel comprises one of a small computer system interface and serial ATA adapter (paragraph [0041]).

15. Regarding claims 8 and 27, Johnson teaches the system of claim 4, wherein the network protocol comprises a network protocol selected from one of Infiniband and TCP/IP (paragraph [0057]).

16. Regarding claims 9, 21, and 22, Johnson teaches the system of claim 1 and the node of claim 18, wherein the common transport agent further comprises a second interface comprising one or more method interfaces to communicate with the network adapter, the one or more method interfaces of the second interface being independent of the network protocol (fig. 6; paragraphs [0012], [0031 - 0033]).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary.

Art Unit: 2157

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

17. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson et al (US 2002/0161934; hereinafter Johnson) in view of Cayton et al (US 2003/0043794; hereinafter Cayton).

18. Regarding claim 23, Johnson teaches substantially all the limitations in claim 18, but fails to specifically teach that the processing system comprises a memory and the interface comprises one or more method interfaces to initiate remote direct memory access transactions to transfer data between buffers in the memory and the storage medium.

19. However, Cayton teaches in an analogous art, a data stream multiplexing in data network, wherein the processing system comprises a memory and the interface comprises one or more method interfaces to initiate remote direct memory access transactions to transfer data between buffers in the memory and the storage medium (paragraphs [0041], [0051 – 0052], and [0067].

20. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teachings of Cayton by having a processing system that comprises a memory and the interface comprises one or more method interfaces to initiate remote direct memory access transactions to transfer data between buffers in the memory and the storage medium for the

Art Unit: 2157

purpose of increasing the overall performance by reducing both latency and utilization of the CPU when transferring data.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yves Dalencourt whose telephone number is (571) 272-3998. The examiner can normally be reached on M-TH 7:30AM - 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571) 272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
